

Welcome to St Patrick's!

Don't be worried if you come from a Non Feeder Primary School!

You might feel scared going to a Secondary School that you've never seen before and where none of your friends are going to go to.

When you first enter those doors you'll feel very nervous but there is no reason to.

By the second day you'll love it. It's a nice place to be with kind and helpful teachers there to help you whenever you need it.

You will make new friends very quick and your new friends will be just as kind and helpful as your old ones!

There are quick and easy ways to remember things like which room your next class is in.

The subjects are always fun and you'll have lots of favourites.

You will find a lot more interesting things at St Patrick's when you start in September. There is always something exciting or fun happening here.

By Don D (Sacred Heart Catholic Primary School)

Welcome to St Patrick's RC High School

If you are reading this, it is likely you may be joining us for Year 7 sometime soon. My name is Miss Wood and I am the current Head of Year 7. Due to COVID restrictions this year we have not spent as much time together as we usually would, but that is okay. When we finally meet, we can make up for all the lost time!

In the meantime, I have collated a group of pupils, all from different year groups to give you an insight on what Secondary School is like. You may recognise some past names that went to your Primary School!

I cannot wait to meet you in person sometime soon!

Miss Wood

Year Focus: Year 8

This year has been a bit different than the usual Year 8 experience because of all of the COVID restrictions, but it didn't stop us from learning and having a good time.

Year 8 has been a great year so far and we have all been able to carry on working remotely, even when we are spending a lot more time at home.

Choosing our optional subjects have become a large part of our year, all our teachers have been trying to make our choices a bit easier by providing us with resources.

Teachers have also been making it easier by concentrating on our mental health and making sure we are always comfortable in the school environment after spending a lot of time at home.

At St Patrick's, even in the toughest times, like this year has been, you will always have someone to talk to and you will always feel safe.

By Freya R (St Mary's Primary School, Eccles)

Subject Focus: Mathematics

Maths classes are really fun because it's a real kick-start to how your future career may be! You get challenged and you have to try hard to do it but it's fun as well. You still get to work as partners and with your friends. If you just try hard it will become easier and more fun because you will begin to like it, even if you didn't like it in the first place.
